

**VERSATIX MP M42 sets new standards in cutting structural steels, sections, tubing and small solids. The new tooth design ensures that the blades can easily cope with the shock loading conditions associated with intermittent cutting and manual 'pull down' band saw machines with uncontrolled feed rates.**

**FEATURES AND BENEFITS**

- New tooth design resulting in a massive increase in tooth strength and consequent reduction in tooth strippage.
- Triple tempered M42 cobalt high speed steel teeth.
- Suitable for use on manual 'pull down' band saw machines.
- Perfect choice for cutting sections, structurals, tubes and small solids.

**APPLICATIONS**

- Sections and structural steels.
- Tubes.
- Angle iron.
- Small solids.

**TOOTH SHAPES**

VERSATIX MP (VX)

A revolutionary new tooth design resulting in massive increase in tooth strength, specifically designed for intermittent cutting of structurals.
