

WOODPECKER PREMIUM band saw blades are designed for all types of wood cutting including contours and feature a spring tempered high carbon steel blade with induction re-hardened teeth, providing decreased production times and a better surface finish.

FEATURES AND BENEFITS

- Ground teeth assure precision cutting, better finish and less kerf loss.
- Hardened teeth - 62 HRC, ensures longer blade life.
- Teeth can be re-ground or re-sharpened and reset.

APPLICATIONS

- All types of wood.
- Plastic.
- Acrylic.

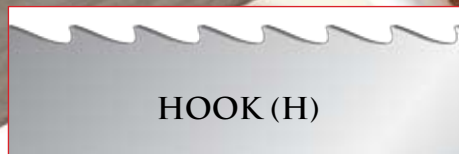

TOOTH SHAPES

SKIP (S)

Zero rake, widely spaced teeth and shallow gullets for cutting large sections.

HOOK (H)

A tooth having a positive rake angle and wide gullet.
